Name: P Karthik
Reg No: 192472038

Course Code: ITA0330
Course Name: Mobile Computing

6 Experiment Name: Mobile Network Handoff Simulation Using Figma

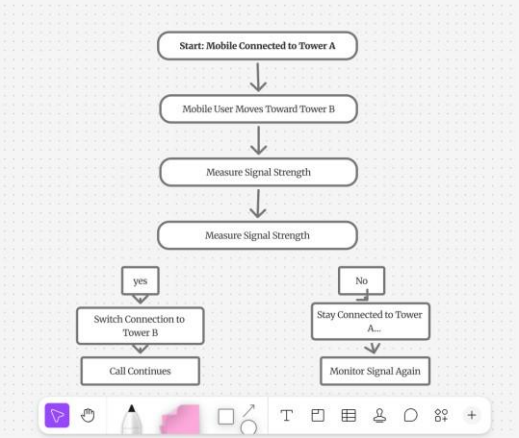

Aim:

To simulate and visualize the handoff process in a mobile network using Figma, showing how a mobile device switches its connection from one base station to another while moving.

Procedure:

1. Open Figma and create a new design file.
2. Select the Frame tool and create frames for the handoff scenario.
3. Add a mobile phone, Tower A, and Tower B using icons and shapes.
4. Show the mobile device moving from Tower A toward Tower B.
5. Use arrows and colors to represent signal strength and connection changes.
6. Add text labels to explain signal measurement and the handoff decision.
7. Use the Prototype tab to connect frames and demonstrate the handoff process.
8. Preview the prototype to check the connection switch from Tower A to Tower B.
9. Review and edit the design for clarity.
10. Save and share the completed Figma prototype.

Output:

Result:

The mobile network handoff process was successfully simulated and visualized using Figma, demonstrating how a mobile device switches its connection from Tower A to Tower B while maintaining network connectivity.
